- School Facility Utilization .............................................................................. 41
Introduction

This Demographic Study provides a comprehensive enrollment analysis for the Buckeye Union School District. The district-wide and school-specific enrollment projections are meant to serve as a planning tool to help with both long- and short-term planning. Demographic Studies examine the factors that influence school enrollments, namely trends in demographics, birth rates, and housing development. They are also used as a tool to identify certain facility planning requirements such as capacity, utilization of existing facilities, planning for modernization or new construction, and attendance boundary redistricting. This Study provides information based on the 2019/20 District enrollments and programs, local planning policies and residential development. As these factors change and timelines are adjusted, the Demographic Study should be revised to reflect the most current information.

Executive Summary

Buckeye Union School District includes five (5) elementary schools, two (2) middle schools, one (1) K-8 Charter Montessori school, and one (1) Mandarin Immersion Charter school program. Buckeye Union School District has experienced a mostly stable enrollment over the past 10 years from an enrollment of 4,715 students during the 2010/11 school year to a current enrollment of 4,657 students.

Buckeye Union School District is projected to decline in enrollment by 0.11% (or 5 students) for the 2020/21 school year. The District is projected to grow overall the next six (6) years, with a projected enrollment of 4,948 students in the 2025/26 school year. This is a total growth of 291 students, which is an increase of 6.25%.

Future impacts from new housing development is predicated upon information provided by local municipalities on the development of 2,076 housing units over the next six (6) years. If the building rates increase or decrease, then the timeline shown in this Study will need to be modified accordingly. These projected new developments in the District's boundary are expected to generate 39 students next year, or a total of 756 students in the next six (6) years.

Based on current District loading standards and classroom space, the District has a net classroom capacity of 6,440 students, and a current enrollment of 4,657. This gives the District a current utilization factor of 72.3%. The projected utilization factor in six (6) years will be 76.8%. This assumes loading standards remain constant and no additional facilities are built or removed.

These projections assume the transfers between schools remain consistent. If changes in facilities, schedules, programs or policies are made, then the patterns may be impacted.
Methodology

The enrollment projections for each school are generated using a State standard weighted cohort trend analysis. The basic projections are created by studying the individual geographic areas. Once the trends are analyzed for each area, the base projections are modified using the following procedures:

a) Birth rates are used to project future kindergarten enrollment. It is assumed if the births indicate there was an increase of 4% one year, then there will be a corresponding 4% increase in the kindergarten class five (5) years later.

b) New Housing Development rates and yield factors are compared to the historical impact of development, and if the future projections exceed the historical values, the projections are augmented accordingly.

c) Inter-District student counts are not included in the base geographic trend analysis since these students reside outside of the District. Therefore, the current number of students-per-school and students-per-grade are added to the base projections.

d) Intra-District students are those who transfer from one school to another. The number of students transferring into and out of each school are calculated and used to determine the difference between the projections for students living in each attendance area versus those that are projected to attend the school.

e) The projections for special education students and alternative programs are created by assuming those programs typically serve a percentage of the total District population. Therefore, as the District grows or declines, the enrollment in those programs would increase or decrease accordingly.

f) The number of students living in the boundary are used to generate the cohort factors. The weighted average of the three (3) years was determined with the current year weighted 50%, the prior year 33.3% and the last year 16.7%. This gives the current trends more value in determining the projections. Those cohorts are then used to determine the students who will be residing in each attendance area for the following years.
The Buckeye Union School District has had a mostly stable enrollment over the past ten (10) years from an enrollment of 4,715 in 2010/11 to the current enrollment of 4,657. This chart provides a summary of the last ten (10) years of historic enrollment and projected enrollment for the next six (6) years. The color orange represents the historic and projected enrollment for the elementary school grades K-5. The color green represents the historic and projected enrollment for the middle school grades 6-8. The entire District enrollment is shown at the top of each bar.
Buckeye Union School District has a current enrollment of 4,657 students. The projected enrollment for next year shows a decrease of 5 students. This one (1) year summary analyzes the net change between the current District enrollment by school and by grade, and the projected enrollment for 2020/21.

The cohort change factor indicates the change in the number of students for each grade compared to the number of students in the prior grade the previous year.

These projections assume the transfers between schools remain consistent. If changes in facilities, schedules, programs or policies are made, then the patterns may be impacted.

The students living in the boundary generate the cohort factors which are calculated for the past three (3) years and the weighted average is determined. Those cohorts are then used to determine the students who will be residing in each attendance area for the following years. Next the attendance factor is used to determine the net enrollment for each grade. The attendance factor is determined by analyzing the current year of students to see how many Inter- and Intra-district transfers there are.
District Map with Student Residential Locations

This map shows the District boundary along with the location of each student based on their residential address. This geographic data is the foundation for our demographic analysis. Any red dots outside the District boundary will represent students attending one of the District schools or programs but have a residence outside the District. This map also identifies different areas of student population density.

Historic Birth Rates

The following section is an analysis of the number of births in the Buckeye Union School District. The number of births are compiled by zip code regions and provided by the Department of Health. The zip code areas do not exactly match the District boundaries and therefore the zip codes 95682 and 95762, which are in the District, were used for this analysis.

The above figure illustrates the correlation between births in the District area and the number of kindergarten students attending Buckeye Union schools five (5) years later. The number of births between 2003 and 2014 has averaged about 629 per year. The recent birth rates over the past four (4) years (2015 to 2018), which will generate the kindergarten classes for the next four (4) years (2020 to 2023), have been between 547 and 605. We have assumed that the average kindergarten capture rate of 75.14% will be maintained in the future. The kindergarten projections shown here do not account for the impact of any additional housing units.
This figure shows the kindergarten capture rates for the past 12 years. Since the birth data is derived from zip code areas, which do not exactly match with the District boundaries, the capture rate also accounts for differences in the coverage areas. Low capture rates are common when a district serves only a portion of a large zip code area. A large capture rate is possible when families move into the area after the children were born, but before they arrived for kindergarten. Overall, the District has had a stable capture rate with a 12 year average of 75.14%.

Transitional Kindergarten

The Transitional Kindergarten (TK) program started in 2012 to provide an extra year for young children to get ready for kindergarten. Currently, the TK program allows four (4) year-olds who will turn five (5) between September 2 and December 2. Some districts allow parents with children just outside that window to also participate in the program. Since the window for the TK program is only 3 months, participation in the TK program is typically around 25% of the total kindergarten enrollment. In most current state processes, such as CalPADS reporting, the State Building Program, and ADA, TK students are included with the kindergarten numbers.
Retention Rates Since Kindergarten

This chart compares the original kindergarten class size to the current enrollment for each grade. For example, the current 6th grade class has 524 students and six (6) years ago the kindergarten class had 414 students. Overall the class sizes have increased since kindergarten.
**Historic Enrollment and Trends**

This chart shows the enrollment by grade level over the past four (4) years. The cohort values were calculated for each grade and each year, along with the weighted average for each grade. A positive cohort value indicates that grade is expected to have more students than the previous grade last year. A negative value would mean that the grade has fewer students compared to the previous grade last year.

In general, a positive cohort is representative of growth and a negative cohort indicates a decline in enrollment. There are some exceptions. First grade usually has a positive cohort, as there are some students that do not attend kindergarten at public schools but arrive in first grade.

Another important item to notice is the current breakdown by grade level of the student population. Comparing the number of students in the lower grades to the upper grades can indicate potential increases or decreases in future enrollments. Also, if there is a large class or a small class, it will slowly cause a ripple in the enrollments as it advances a grade each year.

Finally, the annual change at the bottom of this chart indicates the net impact of the changes in enrollment over the past few years.
This close up view of the District shows the location of the projected new development areas.

**Totals**: 9,226 2,076

Assuming that 2,076 of the 9,226 planned units are completed over a six (6) year period, there would be an average of 346 new housing units per year. To determine the impact of the new housing development, each new housing unit is multiplied by the student yield rate. Currently the District student yield rate is 0.364 students per housing unit. This breaks down as follows:

<table>

Based on 2010 Census Data for school district.

The yield rate used for new construction eligibility determination in the State building program is 0.50 students per home for K-12 districts. The yield rate in the Buckeye Union School District is lower than the State average.
Classroom Counts and Capacity

It is important to understand that capacity and classroom counts may be viewed different ways for different purposes. The State School Facilities Program (SFP) considers all available teaching stations excluding physical education facilities and core facilities (e.g., libraries, multipurpose rooms, and administrative spaces), as part of the site capacity when calculating eligibility for new construction or modernization funding. The State also has its own loading standards per classroom as part of the eligibility determinations.

Another method for calculating capacity and number of classrooms is based on local District standards of class size and a definition of what is considered a full day teaching station. The District may set aside several classroom spaces defined by the SFP for specialized programs or pull-out spaces.

The classroom counts and capacities defined in this Demographic Study represent the rooms that have been identified by Buckeye Union School District administration as designated fulltime teaching stations. This count is a net count and may not take into consideration other rooms which could be used as fulltime teaching stations but are needed for other programs offered by the District.

The classroom counts are shown for each school and are used to determine the capacity. The classroom counts represent the rooms that can be used for teaching purposes at each school site. The classroom counts may not represent the current classrooms being used, as there may be unused rooms on the school site. In some cases, there may be fewer classrooms counted than current teaching stations if some of the rooms being used were designed for other purposes but are currently being used as classrooms due to overcrowding.

The summary below illustrates the difference between the Gross classroom count and the Net classroom count.

School Projections

This Study provides a detailed analysis of student attendance patterns and enrollment for each school. This includes a boundary map illustrating that particular school’s attendance patterns along with a chart showing the projected enrollment for the next six (6) years. These charts indicate the actual enrollment at each school over the past four (4) years along with the projected enrollment for the next six (6) years. In addition, the number of students living in the boundary are shown for the same time period. If there are more students attending than live in the area, then there is a net inflow. If more students live in the boundary than attend the school, then there is a net outflow.

The current capacity is shown on these charts to identify if there will be classroom space available for the students. If space is not available, then the attendance patterns will likely need to change if the additional facilities are not provided. The capacity for each school was determined by using the following loading standards for each classroom identified:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Loading Standard</th>
</tr>
</thead>
<tbody>
<tr>
<td>TK-K (double session)</td>
<td>48</td>
</tr>
<tr>
<td>Full Day (single session) K</td>
<td>24</td>
</tr>
<tr>
<td>1-3</td>
<td>24</td>
</tr>
<tr>
<td>4-5</td>
<td>32</td>
</tr>
<tr>
<td>6-8</td>
<td>32</td>
</tr>
</tbody>
</table>

These loading standards are based on the current loading factors used this year and may change based on the level of funding for schools in the future.

Backup data is provided below each projection chart that shows the calculations of the cohort factors used to determine the enrollment projections for each school.

The number of students living in the boundary are shown, which are then used to generate the cohort factors. The weighted average of the three (3) years was determined with the current year weighted 50%, the prior year 33.3% and the last year 16.7%. This gives the current trends more value in determining the projections. Those cohorts are then used to determine the students who will be residing in each attendance area for the following years. The kindergarten enrollment is projected using the birth data instead of the cohort factor shown here.

The Attendance Factors were determined by analyzing the current year of students to see how many Inter- and Intra-District transfers there are. Once the baseline projections are calculated for the residents in the attendance area, the Intra-District and Inter-District factors are applied to determine the projected enrollment for each school.

The last three (3) columns in the chart, Current Enrollment, 20/21 Projection, and Net Change, show the current enrollment, next year’s projection and net change in enrollment for next year. These are compared by grade to show the details needed for staffing and classroom needs.

### Student Attendance Matrix

This chart summarizes the transfers in and out of each school as were seen by the yellow dots and blue dots on the school attendance maps. In addition, the data has been analyzed to determine the total in-flow and out-flow rates for each school. The school with the largest in-flow rate is Brooks Elementary and the school with the largest out-flow rate is also Brooks Elementary.
This chart compares each individual elementary school enrollment to the students that reside within the school attendance boundary. Utilizing this data helps make it easy to see which schools have the largest and smallest enrollments as well as which boundaries are most populated. Schools with more students enrolled than those living in the boundary have a net transfer into the school. This is typically found at schools with special programs such as Gate or Dual Immersion, schools housing students from overcrowded or Program Improvement (PI) schools, and schools with more capacity than the student population living in the boundary.
District Projections

This graph shows a summary of the projections for the entire District. It shows the current enrollment for 2019/20, the historic enrollment for the past nine (9) years, and the projected enrollment for the next six (6) years. The end result is a total of 4,948 students in the District in 2025/26.

*The projections for these schools don't include the current students transferring out that would attend these schools if they were open.

For 2019, the school with the highest percentage of available space is Camerado Springs Middle and the school that is impacted the most is Rolling Hills Middle.

The actual individual utilizations of the elementary schools will be higher due to housing the projected students from the Silver Dove and Valley View attendance boundaries.
The color-coded map below shows the projected utilization for the elementary schools. The capacities used to calculate these utilizations include all permanent and portable classrooms.

VIII. PRESENTATIONS

1. 2018/2019 Audit Report
   Jen Hall, from Crowe, Horrath presented the 2018/2019 Audit Report. Ms. Hall reported that the District has a clean audit, with one exception. A finding was made in relation to the paperwork involving the student inventory for the ASB account. Ms. Hall noted that this is a very common issue with respect to ASB accounts. Ms. Hall reported that this is driven primarily by the fact that these are funds primarily managed by students and there is a high turnover rate from year to year in who is doing these tasks. Again, Ms. Hall emphasized the District’s audit found all to be in order.

1. Budget Update: Jackie McHaney

2. Association Reports: BTA/CSEA
   None.
   Ms. Zawilski reported that CMP had their audit report completed as well and she is pleased to report that it was a clean audit with no findings. Ms. Zawilski also shared that many of their students were invited to write and submit their resolutions for the New Year to the Mountain Democrat, the editors were so impressed they ran it in two editions. Ms. Zawilski shared copies of the editions. She and her staff are now focusing on interim testing, and have done some manual scoring to see where their benchmarks are at this time of the year.

   the prior month’s report.

9. Superintendent’s Report: Dr. David Roth
   Superintendent David Roth reminded the Board that on January 17th, the
   District will be holding its All Staff I-day at Rolling Hills. This will be the
   I-day in which the District will present tenure certificates and service pins
   to our employees. Superintendent Roth invited the Board members to join
   them if they could. Superintendent Roth also reported that it is now that
   time of the year in which we start planning for the next school year. In so
   doing, we have been pushing out advertising on social media platforms. It
   appears we have been getting lots of hits on these sites. In addition, we
   have marketed our IB programs and Mandarin Program via the Palladio
   Electronic Marquee, we believe we will split our adds and extend them for
   an additional month. Camerado Springs is reporting people are calling into
   the site earlier than ever this year, with one specifically noting the Marquee
   advertisement. Tonight Oak Meadow is having their Mandarin Immersion
   parent meeting and Principal Doug Shupe and IB Coordinator Amy Gargani
   are at Eich Middle School for their IB Parent presentation.

   [Re-ordered Item] California School Dashboard - State and Local Indicators
   Report Superintendent David Roth reported on the Buckeye, Mandarin

   The presentation can be found on our website under Board Agendas and

BUCKEYE UNION SCHOOL DISTRICT

AGENDA ITEM #: XII.1. ACTION: Update of 2019 Local Control and Accountability Plan (LCAP) ESSA Federal Addendum

SITUATION:

Subsequent to the Board’s approval of the LCAP ESSA Federal Addendum in June 2019, the California Department of Education (CDE) reviewed the District’s document and requested revisions. The District is submitting the updated document that received final approval from the CDE to the Board for final approval.

Effective 2018, Local educational agencies applying for the Every Student Succeeds Act (ESSA) Federal Funds must complete the LCAP Federal Addendum as part of meeting the requirements for the ESSA LEA Plan. The ESSA, a federal law, requires school districts that apply for federal funding to complete a federal addendum have the federal addendum adopted by the Governing Board and electronically submit the federal addendum to the California State Department of Education. The federal addendum takes the place of the Local Education Agency (LEA) Plan that had been in place since 2002 and revised annually.

Title I
In Buckeye Union School District, Buckeye Elementary is the only school site designated as socioeconomically disadvantaged and eligible to receive Title I funds. In California, Title I schools and Title I districts must meet annual proficiency targets in the areas of English Language Arts (ELA) and Mathematics as indicated on the California School Dashboard. Title I schools that are in the lowest 5% of schools enter into a State program of Comprehensive Support and Improvement (CSI). Additionally, a school could be identified for Targeted Support and Improvement (TSI) for a subgroup(s) that does not meet proficiency. **There are no schools in Buckeye USD that qualify for comprehensive support and improvement (CSI) or additional targeted support and improvement (ATSI).**

Title II Professional Development Funding for Principals and Teachers
This funding is for professional development for administrators and teachers.

Title III
Title III, under the new federal ESSA (Every Student Succeeds Act), provides supplemental funding to districts for programs designed to help students receiving English Learner (EL) services attain English proficiency and meet the State’s academic and content standards. Title III accountability is a set of annual academic performance goals established for each district to hold them accountable for the progress and performance of ELs.

Title IV
This funding is used for professional development of certificated personnel.

PLAN:
The State consolidated plan under the Every Student Succeeds Act (ESSA) for Title I, II, III and IV was approved by the United States Department of Education in July 2018 after a few revisions. The State of California uses the California Assessment of Student Performance and
Progress System (CAASPP) including the Smarter Balanced assessment system to measure the academic achievement of students, including Title I and Title III students, and will disaggregate data by subgroup data for the new accountability system. The District will also submit additional data documenting progress in alignment to the Local Control Accountability Plan (LCAP).

The plan is to have the Board review and approve the ESSA Federal Addendum. Once approved, the federal addendum will be submitted to the California Department of Education for approval and as a next step to apply for ESSA funding.

**LONG RANGE GOAL:**
District Goal # 1: Maximize Student Achievement
District Goal #2: Maintain Fiscal Integrity & Accountability of the District
District Goal #5: Promote Development of Each Student as a “Whole” Person

**SUPERINTENDENT’S RECOMMENDATION:**
The Superintendent recommends the Board approve the updated ESSA Federal Addendum as presented.

Instructions

The LCAP Federal Addendum is meant to supplement the LCAP to ensure that eligible LEAs have the opportunity to meet the Local Educational Agency (LEA) Plan provisions of the ESSA.

The LCAP Federal Addendum Template must be completed and submitted to the California Department of Education (CDE) to apply for ESSA funding. LEAs are encouraged to review the LCAP Federal Addendum annually with their LCAP, as ESSA funding should be considered in yearly strategic planning.

The LEA must address the Strategy and Alignment prompts provided on the following page.

Each provision for each program must be addressed, unless the provision is not applicable to the LEA.

In addressing these provisions, LEAs must provide a narrative that addresses the provision within the LCAP Federal Addendum Template.

Under State Priority Alignment, state priority numbers are provided to demonstrate where an ESSA provision aligns with state priorities. This is meant to assist LEAs in determining where ESSA provisions may already be addressed in the LEA’s LCAP, as it demonstrates the LEA’s efforts to support the state priorities.

The CDE emphasizes that the LCAP Federal Addendum should not drive LCAP development. ESSA funds are supplemental to state funds, just as the LCAP Federal Addendum supplements your LCAP. LEAs are encouraged to integrate their ESSA funds into their LCAP development as much as possible to promote strategic planning of all resources; however, this is not a requirement. In reviewing the LCAP Federal Addendum, staff will evaluate the LEA’s responses to the ESSA plan provisions. There is no standard length for the responses. LEAs will be asked to clarify insufficient responses during the review process.

California’s ESSA State Plan significantly shifts the state’s approach to the utilization of federal resources in support of underserved student groups. This LCAP Federal Addendum provides LEAs with the opportunity to document their approach to maximizing the impact of federal investments in support of underserved students.

The implementation of ESSA in California presents an opportunity for LEAs to innovate with their federally-funded programs and align them with the priority goals they are realizing under the state’s Local Control Funding Formula (LCFF).

LCFF provides LEAs flexibility to design programs and provide services that meet the needs of students in order to achieve readiness for college, career, and lifelong learning. The LCAP planning process supports continuous cycles of action, reflection, and improvement.

Please respond to the prompts below, and in the pages that follow, to describe the LEA’s plan for making the best use of federal ESEA resources in alignment with other federal, state, and local programs as described in the LEA’s LCAP.
Strategy

Explain the LEA’s strategy for using federal funds to supplement and enhance local priorities or initiatives funded with state funds, as reflected in the LEA’s LCAP. This shall include describing the rationale/evidence for the selected use(s) of federal funds within the context of the LEA’s broader strategy reflected in the LCAP.

The Buckeye Union School District uses federal funds to support and enhance educational services offered to students. Programmatic needs are determined using local and state measures, stakeholder feedback, and performance data from the California School Dashboard. In order to address achievement gaps among socioeconomically disadvantaged students and English learners, the District uses Title I and Title III funds to support the base educational services through the use of small group instruction and intervention. Title II and IV funds are utilized to provide professional development to support the professional development of service providers that serve underperforming and at-risk students.

Alignment

Describe the efforts that the LEA will take to align use of federal funds with activities funded by state and local funds and, as applicable, across different federal grant programs.

The LEA works to align the use of federal funds with activities funded by state and local funds through the LCAP community engagement process, discussions with the District Board of Trustees, school site councils, and the DELAC/ELAC. A variety of data points are used to inform those discussions including academic performance, discipline, absenteeism, parent engagement, and teacher/administrator reports.

ESSA Provisions Addressed Within the LCAP

Within the LCAP an LEA is required to describe its goals, and the specific actions to achieve those goals, for each of the LCFF state priorities. In an approvable LCAP it will be apparent from the descriptions of the goals, actions, and services how an LEA is acting to address the following ESSA provisions through the aligned LCFF state priorities and/or the state accountability system.

ESSA Provisions Not Addressed in the LCAP

For the majority of LEAs the ESSA provisions on the following pages do not align with state priorities. Each provision for each program provided on the following pages must be addressed, unless the provision is not applicable to the LEA. In addressing these provisions, LEAs must provide a narrative that addresses the provision within this addendum.

As previously stated, the CDE emphasizes that the LCAP Federal Addendum should not drive LCAP development. ESSA funds are supplemental to state funds, just as the LCAP Federal Addendum supplements your LCAP. LEAs are encouraged to integrate their ESSA funds into their LCAP development as much as possible to promote strategic planning of all resources; however, this is not a requirement. In reviewing the LCAP Federal Addendum, staff will evaluate the LEA’s responses to the ESSA plan provisions. There is no standard length for the responses. LEAs will be asked to clarify insufficient responses during the review process.

TITLE I, PART A

Educator Equity
ESSA SECTION 1112(b)(2)

Describe how the LEA will identify and address, as required under State plans as described in Section 1111(g)(1)(B), any disparities that result in low-income students and minority students being taught at higher rates than other students by ineffective, inexperienced, or out-of-field teachers.

Parent and Family Engagement
ESSA SECTIONS 1112(B)(3) AND 1112(B)(7)

Describe how the LEA will carry out its responsibility under Section 1111(d).
Describe the strategy the LEA will use to implement effective parent and family engagement under Section 1116.

THIS ESSA PROVISION IS ADDRESSED BELOW:
The District primarily focuses Title I, part A funds on the Buckeye Elementary Campus, our site with the highest proportion of economically disadvantaged students.

The parent and family engagement policy was shared with parents at an initial Title 1 family meeting in the fall of each school year. A copy of the written policy is made available to the parents at that time. Input on the policy and recommendations were solicited from the participating parents.

Parent education nights are provided to our Title 1 parents throughout the school and cover a variety of topics that reflect the input gathered from conducting needs assessments. The topics address the rigor involved with our state standards, how to support student achievement, as well as the local and state assessments that will be used to monitor student achievement.

The LEA will educate teachers, specialized instructional support personnel, principals, and other school leaders, and other staff, with the assistance of parents, in the value and utility of contributions of parents, and in how to reach out to, communicate with, and work with parents as equal partners, implement and coordinate parent programs, and build ties between parents and the school by incorporating into annual professional development that will occur during staff meetings and/or in-service days. The District's Title I coordinator will facilitate the participation of parent liaisons in the development of these trainings.

We will provide reasonable accommodations, such as sign-language interpreters, to parents and family members with disabilities. Special accommodations will be made for communicating with families that have accessibility needs or other special needs which make corresponding with the school difficult (e.g. home visits). The LEA will provide opportunities for the informed participation of parents and family members of migratory children by meeting with parents and family members before students are away from school for an extended period of time and once the students return after and extended absence to help parents overcome educational disruption.

The LEA will ensure that a Title I parent liaison is identified to participate on the LCAP Parent Advisory Committee. The LEA also provides opportunities for parent engagement and update regarding the LCAP at the school site level with parent meeting opportunities.

Based on the initial needs assessments, the Title 1 families are given training on how to support students with both literacy and mathematics. This past school year, we held several workshops on how to support students with the mathematics at home. In addition, we share information on how to access online tools at home to support student learning such as Lexia Core 5, ST Math, and Raz-Kids.

Several members of our staff have attended workshops and trainings that involved supporting families that live in poverty. A team of teachers attended the Poverty Institute in Portland and another group attended a training on coaching teachers and staff to support families living in poverty. This information was brought back and shared with the staff during multiple staff meetings throughout the school year. This training also led to increase in community outreach with members of the staff visiting the low income apartment complexes that feed into our school to distribute materials and food before the start of the school year.

We have a Head Start preschool program on our site and we invite the families to our school-wide events such as our family literacy night and other school-wide functions. In addition, we advertise our family education nights to the preschool families. We currently support our families with various needs such as gas cards, helping with laundry, directing them to local food pantries. Additionally, clothing needs, food, and gifts around the holidays are provided through local churches. Furthermore, he local Rotary Club supplies refurbished bikes to some of our Title 1 students.

Communications are sent weekly to all families and hard copies are sent out in Friday Folders. For our Spanish speaking families we hire an interpreter for all Title 1 meetings. In addition, meeting notices are posted in both English and Spanish.

Since background checks are required for all parent volunteers, we provide a financial assistance for those families that need support in completing the necessary background checks. We also discuss the various opportunities to become involved at the school during our parent meetings.

Communications are sent to all parents about the ability to be involved in various committees such as ELAC, SSC, PTC, and District committees. Our interpreter works with our Spanish speaking families to articulate the opportunities at our school.
**Schoolwide Programs, Targeted Support Programs, and Programs for Neglected or Delinquent Children**  
ESSA SECTIONS 1112(b)(5) and 1112(b)(9)

Describe, in general, the nature of the programs to be conducted by the LEA’s schools under sections 1114 and 1115 and, where appropriate, educational services outside such schools for children living in local institutions for neglected or delinquent children, and for neglected and delinquent children in community day school programs.

Describe how teachers and school leaders, in consultation with parents, administrators, paraprofessionals, and specialized instructional support personnel, in schools operating a targeted assistance school program under Section 1115, will identify the eligible children most in need of services under this part.

**THIS ESSA PROVISION IS ADDRESSED BELOW:**

We are a Targeted Assistance School and identify students in need of additional support based on local and state assessments. We also consider information provided during the registration process to identify families that may need some additional support for both home and school. Students that are identified receive additional literacy support in the way of reading intervention on either a pullout or push-in basis depending on their level of need. We also purchase additional online tools that can be used both in the classroom and home to help students progress with math and literacy. Our families are offered a wide variety of educational opportunities around how to best support their child. We also provide an English language development class for some of Spanish speaking parents.

SWP: N/A  
Neglected or delinquent: N/A

Working with the staff, we identify students in need of additional support based on local and state assessments. We also consider information provided during the registration process to identify families that may need some additional support for both home and school. The information on who will receive targeted assistance and the criteria in which they are identified is shared with the parents during the initial parent information night at the start of the school year. The progress of these students is monitored throughout the school year by relevant staff members and progress is shared with the families at each trimester.

**Homeless Children and Youth Services**  
ESSA SECTION 1112(b)(6)

Describe the services the LEA will provide homeless children and youths, including services provided with funds reserved under Section 1113(c)(3)(A), to support the enrollment, attendance, and success of homeless children and youths, in coordination with the services the LEA is providing under the McKinney-Vento Homeless Assistance Act (42 United States Code 11301 et seq.).

**THIS ESSA PROVISION IS ADDRESSED BELOW:**

Our homeless students are supported in a variety of ways including transportation to and from school, academic resources to be utilized at home, support with various material needs such as school supplies and clothing, and information on how to access community resources. Upon notification that a student is eligible under McKinney Vento the LEA puts families into contact with both the District and county homeless liaison. A child experiencing homelessness is entitled to the same free and appropriate public education as provided to other children and youths. The LEA ensures no barriers impede a student from immediately enrolling in school and ensures that without delay the child may either attend their school of origin or their current school of residence. The LEA will provide transportation and other necessary services such as free meal programs. During the school day, homeless students receive support based on their level of needs. We provide both social emotional support as well as academic. Reservation funds are used to defray the costs of transportation as well as providing gas cards and basic necessity supplies for these students which can range from items like shampoo and toothpaste to socks and shoes.

**Student Transitions**  
ESSA SECTIONS 1112(b)(8), 1112(b)(10), and 1112(b)(10) (A–B)
Describe, if applicable, how the LEA will support, coordinate, and integrate services provided under this part with early childhood education programs at the LEA or individual school level, including plans for the transition of participants in such programs to local elementary school programs.

Describe, if applicable, how the LEA will implement strategies to facilitate effective transitions for students from middle grades to high school and from high school to postsecondary education including:

(A) coordination with institutions of higher education, employers, and other local partners; and

(B) increased student access to early college high school or dual or concurrent enrollment opportunities, or career counseling to identify student interests and skills.

**THIS ESSA PROVISION IS ADDRESSED BELOW:**

N/A

The LEA facilitates effective transitions for students from middle grades to high school by conferring with counselors at the receiving high schools, about the needs of at-risk students, prior to the end of the 8th grade year.

**Additional Information Regarding Use of Funds Under this Part**

**ESSA SECTION 1112(b)(13) (A–B)**

Provide any other information on how the LEA proposes to use funds to meet the purposes of this part, and that the LEA determines appropriate to provide, which may include how the LEA will:

(A) assist schools in identifying and serving gifted and talented students; and

(B) assist schools in developing effective school library programs to provide students an opportunity to develop digital literacy skills and improve academic achievement.

Professional Growth and Improvement
ESSA SECTION 2102(b)(2)(B)

Provide a description of the LEA’s systems of professional growth and improvement, such as induction for teachers, principals, or other school leaders and opportunities for building the capacity of teachers and opportunities to develop meaningful teacher leadership.

THIS ESSA PROVISION IS ADDRESSED BELOW:

The LEA provides all newly credentialed teachers with an induction coach that works with the new teacher throughout the year. All teachers are provided three in-service days each year and the District convenes grade level representatives who participate as learning community facilitators who participate in District training that they bring back to their teams at the sites. The LEA also provides early release time on a weekly basis in which teachers work on their professional practices. The LEA measures growth of teachers through principal and district administrator observations and student performance data. The District evaluates all teachers on either an annual or every 5 year cycle depending upon performance. Within this process teachers and principals identify professional goals and participate in a reflective observation process. In the event teachers are not performing in a satisfactory manner, we offer a process of peer assistance and review. Teachers are encouraged to bring forth professional development interests at any time and are provided financial incentives in the collective bargaining agreement to pursue professional development.

Principals are evaluated annually by the Superintendent. During that process, principals establish goals and participate in a series of reflective conversations and reviews of school performance data. Principals participate in professional development alongside of teachers during District in-service and early release days, at leadership meetings, and other venues.

Other school leaders are evaluated by the Superintendent or the supervising administrator for their position. This process includes goal setting, reflective conversation, and reviews of District performance data. Professional growth is further supported during their participation at District in-service days, early release day pd, leadership meetings, and other venues.

These systems promote professional growth and ensure improvement as they engage all parties in a continuous improvement cycle that is inherent in our systems culture. The system ensures that both employees and administrators can communicate the areas of support they most require for professional growth in order to ensure improvement. The LEA measures growth and improvement using the metrics incorporated into the California Dashboard.

These systems support principals, teachers, and other school leaders by promoting continuous reflections on professional practices, promoting engagement in ongoing professional development, and providing reflection upon and feedback regarding outcomes.

In order to evaluate its systems of professional growth and improvement, the District collects participant feedback from all parties in relation to District professional development activities. We also survey parties on their professional development interests as well as identify areas of challenge in outcome data in order to ensure the focus of professional development and support is designed for maximal impact.

THIS ESSA PROVISION IS ADDRESSED BELOW:
The Buckeye Union School District consults with teachers via site council, which meets at least four times a year. It also meets at teacher work days with administration present on a monthly basis where they discuss instructional strategies and academic results and suggest courses of action for specific grade levels and/or departments as well as school-wide projects and activities. Special education staff and school counselors are involved in this work and they also have an opportunity to brief staff regarding individual students that need support in specific ways. Principals and other school leaders, are also involved in site council meetings, LCAP team, and teacher targeted collaboration work days. In addition, each teacher and classified staff member has an opportunity to address the Governing Board regarding any requests or recommendations for change. Parents are included in Site Council and LCAP team, back to school night, community forums, and Governing Board meetings. Buckeye Union School District has three (3) middle schools all of whom provide a Student Body representative to present at Governing Board meetings on the activities and goals for each school site, which helps improve attendance at these meetings where often times budget information is discussed.

In addition, the District is in the process of implementing the Multi-Tiered System of Supports (MTSS) and Positive Behavior Intervention Services (PBIS) at many of its school sites and will be supplementing professional development and resources for supporting MTSS and PBIS both academically and behaviorally with Social and Emotional Learning (SEL).

Program objectives and intended outcomes for the activities described herein include, but are not limited to, improving individual student academic achievement as well as improving appropriate classroom and school behaviors. At the elementary and middle school level we have an increasing number of students in need of early intervention for mental health support, specifically as it relates to behavioral and verbal challenges.

BUSD provides opportunities for students to develop self-awareness, self-management, social awareness, relationship skills, and responsible decision-making skills in addition to bullying prevention programs all in an effort to form a cohesive and safe, supportive school environment on all of our campuses. For example, last year our middle schools hosted Point Break Assemblies at our middle school as well as Color Point – both of which are designed to train students to develop self-awareness/empathy as part of an anti-bullying prevention program. Several of our sites are implementing PBIS and have created staff and student videos modeling appropriate and inclusive behaviors for students.

BUSD uses the Local Control Accountability Plan (LCAP) process to guide instruction and services to students in the District. On an annual basis, BUSD gathers data on suspensions, expulsions, absenteeism, academic achievement, promotion rates, appropriately credentialed teachers and sufficient instructional materials and presents that information at multiple public forums. With respect to the effectiveness of the planned professional development and targeted intervention services to improve student achievement, BUSD will use such tools as curriculum based assessments, Illuminate, SBAC, ELPAC and interim benchmark assessments, to analyze the data to determine whether the measures are resulting in the intended outcomes. With respect to the effectiveness of the planned programs and services for students to improve classroom and school-wide behavior and address the social emotional learning needs of each student, BUSD will use such tools as student groups with school counselors, analyzing data on suspensions, expulsions, and school office referrals, as well as analyzing data related to school safety and climate that is gathered through the annual District survey and the California Healthy Kids Survey.

Buckeye Union School District has chosen to utilize its funds to support teachers in their professional development, including intervention teachers who are on staff at each site to ensure all students have the support they need to pass core classes under Section 4107. Additionally, Buckeye USD has special education staff and counseling services on all of its campuses, including its three (3) middle schools, who work with the high school district to ensure a smooth transition to the high school upon promotion from our school district. Buckeye USD supports safe and healthy students in several ways, including providing health clerks at each school site, employing district-wide school nurses, employing school counselors at each school site, employing district-wide school psychologists, providing free and reduced meals and transportation services.
