

Buckeye Union School District

E-RATE Year 22 (2019-2020) - 470 # 190019565

RFP #2019-1 Access Points

Addendum #1

Date: February 19, 2019

THIS ADDENDUM IS ISSUED AS ADDITIONAL INFORMATION AND/OR AS A CHANGE IN SPECIFICATIONS OR INSTRUCTIONS TO ALL PROSPECTIVE BIDDERS INTERESTED IN THE ABOVE MENTIONED REQUEST FOR PROPOSAL.

The due date for this RFP is being extended as follows.

REVISED RFP DUE DATE: March 19, 2019 at 2:00 pm

REQUEST FOR INFORMATION:

Q: Your form RFP lists Clear Pass Management Software. This is for authentication and requires end user licenses and device licenses which come in packs of 100.

- a. Are you thinking of Clear Pass or Aruba Central cloud controller?
- b. We need to know the total number of the end users that will be authenticated through the clear pass?
- c. We also need to know how would you like us to split this cost between the sites?
- d. Clear pass comes as virtual appliance (this needs VM environment on site) and as a physical device. Which would you prefer?
- e. Device licenses come in 1, 3, and 5 years and as perpetual which comes at a higher cost but the district owns it outright, which would you prefer?

A: BUSD has chosen not to pursue Clear Pass Management Software, or equivalent w/ applicable licensing for all access points. Any proposals that include pricing for Clear Pass Management Software, or equivalent w/ applicable licensing for all access points will be evaluated without those items.

Q: Can you confirm what Category the Patch panels are in all the schools? Cat 5e or Cat 6? Special attention to the cable being reused possibly at Blue Oak also. If the new cable is Cat 5e, we could not reuse them. Just confirming.

A: BUSD has a variety of existing patch panels at the sites, CAT 5e and CAT 6. All existing patch panels will be reused regardless if they are CAT 5e or CAT 6. Existing cabling that can possibly be reused at Blue Oak is CAT 6. Please note that not all buildings at Blue Oak have existing CAT 6 cabling, and that the reuse of any cabling will be at the risk of the proposer. A revised map has been attached (**Attachment No. 1**) showing what classrooms at Blue Oak did not get rewired during the recent modernization project. BUSD can confirm that a pathway exists with sufficient room to allow for wiring the classrooms shown on the attached drawing.

Q: Can you let us know which panels do not have enough room for the new cables to be pulled to and that there is room in the cabinet for adding another?

A: BUSD has confirmed that all panel have a sufficient number of empty ports for the new cabling.

Q: If we have to add a patch panel, what size panel do you want us to use? 24 or 48 port?

A: The addition of patch panels will not be necessary.

Q: Each school had a gym/multi-purpose room. For the sections that we HAVE to pull the further WAP cable on the inside of the gym wall (Or gym side), do you want EMT conduit used or will a plastic raceway work?

A: If it is not possible to install the new cables behind the wall, wall mounted cables shall be installed in EMT.

Q: Can you confirm a pathway from building to building at Blue Oak (F – Building)?

A: It has been confirmed that a pathway exists between Classroom 23 and Classroom 25 at Blue Oak.

Q: Are these buildings/ceilings Plen or Riser?

A: All of the buildings/ceilings would be considered a plenum. Cabling will need to be plenum rated.

Q: Do you want 1 cable or 2 cables pulled per WAP?

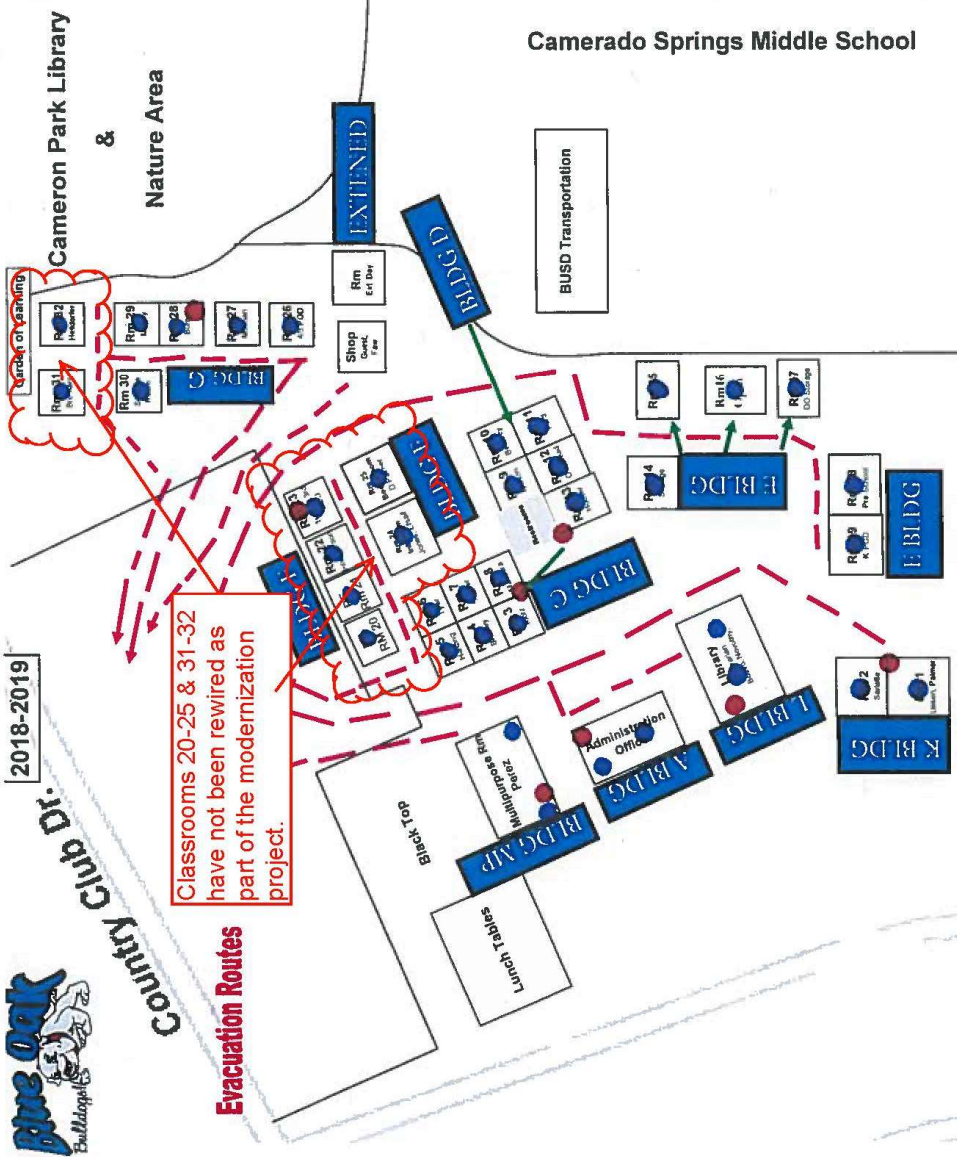

A: 1 cable.

Q: Do you have an estimate on this project?

A: No.

Attachment No. 1 – Revised Blue Oak Map
